

“A Suburban team member came to my mother's home and met with me and her to set up her new alert device. Their warm and friendly manner, combined with organized and thorough explanations, immediately put my mom at ease and made all the difference for us in learning the features of the device. Additionally, we acquired a good understanding of the system support she will receive as a new customer. As a seasoned nurse, I am well aware of how a single person can positively impact a patient's day and their health outcome. They did that today for my mom. ”

-Patti G., daughter of a PERS User
